

Diversity Statement

The 'Paläontologische Gesellschaft' is dedicated to the scientific study of life of past geological periods and the evolutionary history of organism in a very broad context. As scientists and individuals, we believe that diversity and inclusion are integral parts of our science and society in general, regardless of age, culture, ethnicity, gender identity or expression, national origin, physical or mental difference, politics, race, religion, sex, sexual orientation, socio-economic status, or subculture. We therefore promote diversity in all areas of our activities and reject strongly and proactively prejudice and stereotyping wherever we encounter it in our profession.
